BOOK SYNOPSIS

A special edition for aspiring astronomers living south of the equator. This special edition of 50 Things to See with a Small Telescope explores the planets, stars, galaxies and nebulae observed from all over the southern hemisphere. Not only does this book demonstrate how to find things, it also shows what many of these objects look like through a small telescope! Here are just some of the items this book will help you find: * Planets * Nebulae * Comets * Globular Clusters * The International Space Station I am very excited to share my knowledge of astronomy and I am sure you will enjoy this book for years to come.
